INDUSTRY ACADEMIA INTERFACE

The purpose of two years' regular MBA course is to equip the students with required skills and knowledge to work as a team toward common goals. As a management student it is essential to gain industrial experience for empirical learning. Acknowledging this, SJPI mandated its students to pursue summer internship for Six to Eight weeks after the completion of first year. Within a stipulated duration of Eight weeks, summer internship endows the students to envisage corporate attributes both relating to methodology and operations. On the completion of the internship, students are required to present a report comprising of various management applications they learnt during the internship, followed by a class presentation. More over, the final year students have to do empirical research in the form of Grand Project. The students are groomed by their faculty guide on a continuous basis during the above research.
